if Electronic billboards were:

1. Kept in scale with the historic neighborhood, (HPOZ) height limits
2. Shaped with round corners like the earlier billboards,
3. if they were shutdown at a reasonable time between 11 pm and 2 am and weren't turned back on until 6 or 7 am. would be OK
4. if a percentage of funds levied by the city for billboard licenses and permits or taxes could go to the Business Improvement District for costs of sidewalk cleaning, trash removal and graffiti or tagging removal.
5. a maximum number of billboards were allowed per block. two or three.

Thank you for allowing me to add my two cents
